Technical Skills

Front-End: HTML, CSS, Tailwind CSS, JavaScript, React.js, Daisy Ui, GSAP, TypeScript

Back-End: Express, Node.js, Python, WebSockets

Database: MongoDB, Firebase

Projects

1. Pinterest Project

I built a Pinterest clone using the MERN stack, allowing users to upload and share images, create boards, and pin their favorite content. React.js was used for the front-end, providing a dynamic user experience, while Node.js and Express.js powered the back-end. MongoDB was used to store images and user data efficiently. The project demonstrates my skills in full-stack development, integrating both front-end and back-end technologies. It showcases my ability to create interactive, scalable web applications

2. Spotify Project

I developed a Spotify clone using the MERN stack, allowing users to stream music, create playlists, and explore songs. React.js was used for a responsive and dynamic user interface, while Node.js and Express.js handled the back-end functionality. MongoDB was employed for efficient data storage, managing user profiles, playlists, and music tracks.

3. My Portfolio

I created a personal portfolio using the MERN stack, featuring a contact form, a skills page, and interactive animations. The front-end was built with React.js, ensuring a smooth and responsive experience. I incorporated GSAP (GreenSock Animation Platform) to add animations, enhancing user interaction and engagement. The back-end, powered by Node.js and Express.js, supports the contact form functionality, while MongoDB manages data storage.

4. Snake Game

I developed a classic Snake game using HTML, CSS, and JavaScript, providing an interactive and fun gaming experience. The game features a responsive interface where the player controls the snake to eat food, grow in size, and avoid collisions. JavaScript handles the game logic, such as movement, collision detection, and score tracking.

Education

GLA University, Mathura

Bachelor of Computer Application

Jan 2024-Ongoing

Noble School Falna, Rajasthan

Class 12, RBSE, 76%

2022

Noble School Falna, Rajasthan

Class 10, RBSE, 71%

2020

Work Experience

Full Stack Developer intern

by Skill Academy Testbook

Nov2023-Dec2023

Achievements/Extra Co-curricular Activities/Position of Responsibility

1. Received a certificate for successfully completing an internship, where I gained hands-on experience in **Full Stack Developer** and contributed to **Hotel Booking Application**.

2. Earned a certificate for completing the **Full Stack Developer** course, which enhanced my knowledge and skills in **MERN Stack**.

3. Contributed to open-source projects on **GitHub**, focusing on improving **my skills**.

4. Solved 300+ coding problems on LeetCode, demonstrating strong problem-solving and algorithmic skills.
